8. Policy

8.1 Curriculum Aims

The curriculum should inspire and challenge all learners and prepare them for the future. Our aim is to develop a coherent curriculum that builds on young people's experiences in their main school phase and that helps them become successful learners, confident individuals and responsible citizens.

Our curriculum promotes the spiritual, moral, social and cultural development of pupils:

Spiritual Development

During the range of activities on offer to learners at Educ8, learners can develop a sense of enjoyment and fascination in learning about themselves, others and the world around them. Learners are consistently encouraged to use their imagination and creativity in their learning and showcase a willingness to reflect on their own, and others, experiences.

Moral Development

Educ8 helps learners understand and follow school and class rules, and understand their responsibilities within society. This helps them understand the difference between good and bad choices, and between right and wrong. It helps them understand the consequences of their actions both positively and negatively.

Social Development

Learners at Educ8 use a range of social skills in different contexts, including working and socialising with learners and staff members from different religious, ethnic and socio-economic backgrounds. This promotes a willingness to participate in a variety of social settings, cooperating well with others, and being able to resolve conflicts effectively. It also encourages an interest in, and understanding of, the way communities and societies function at a variety of levels. Learners also develop their friendship and social mixing through group discussions, role plays and debates.
